FREELANCER OS

Your template is ready

Complete tier — all five templates, including the Invoice & Income Tracker and Proposals & Meetings

YOUR NOTION TEMPLATE LINK

[[DUPLICATE LINK — inserted at listing time]]

Get set up in three steps

1. Open the link above (sign in to Notion, or create a free account).
2. Click **Duplicate** in the top-right corner and choose your workspace.
3. Open **Clients**, **Projects** and **Invoices** and delete every entry marked **[Sample]** — they are there to show you how the system works.

That is everything. Your home page — **Freelancer HQ** — shows today's tasks, active projects, unpaid invoices and your client pipeline in one place. Works with a free Notion account; no other software needed.

Something not working? If the link will not open or the template will not duplicate, message the shop and it will be fixed or refunded.
